1. Overview

Hydraulic fittings and connectors are divided into fittings for rigid tubing and connectors for flexible tubing in terms of tubing material.

- Fittings for rigid tubing

Male threaded fitting can be tightly connected to ferrule or washer to be (form) a high leak-tight connection. Applied to PTFE, FEP and some other tubing. These fittings are divided into flangeless, flanged, Clamp ring flangeless fitting.

- ✧ Flangeless fitting: An economic and durable inverted fitting. Installing without specialized tool. Simply screw fitting on the tubing and insert the ferrule into fitting. The flangeless fitting is used together with ferrule.
- ✧ Flanged fitting: The flanged fitting is used together with washer. Washer is located between the fitting and flange edge which must be flat. Screw in the fitting with flange edge to form a seal, the wetted part is tubing.
- ✧ Lock ring & ferrule: include the fitting, ferrule and clamp ring, material of ferrule is PEEK. Insert the fitting, ferrule and clamp ring into the rigid tubing in sequence; place the clamp ring on the external port of the tubing, compact the ferrule and clamp ring on the fitting before using them.

- Connectors for flexible tubing

Insert barbed connector into flexible tubing; the flexible tubing will swell and be sealed because of pressure from barb, pressure of seal: $\leq 200 \text{ kPa}$ (29psi) (Test condition: TPE tubing 65(Shore A), swelling ratio: approx. 20%~50%, ordinary temperature). Barbed connectors are applied to silicon, TPU, TPE, PU and some other flexible tubing. The connectors are divided into barb to barb connectors, thread to barb connectors.

- ✧ Barb to barb connectors: The connectors are divided into straight through, tee, Y style, elbow, cross, π style and some other connectors for flexible tubing. These connectors are also divided into barb to barb connectors of equal diameter and barb to barb connectors of reducer union in terms of various connect tubing diameter.
- ✧ Thread to barb connector: Thread on the Connector is good for arrangement, confluence, and immobilization of tubing. The Connectors are divided into bottom seal and threaded seal in terms of the ways how the thread is sealed.
 1. Bottom seal: There is a step surface at end of male thread which will be in contact with bottom of male thread and form a seal by threaded extrusion.
 2. Threaded seal: Wrap a Teflon tape between male thread (UNF, NPT, PT, G threaded connectors) and male thread to make them sealed.
 3. Female thread to barb Connector: applied to connect between rigid tubing and flexible tubing.
- ✧ Luer Fittings: The plug-in connectors consist of a male luer and a female luer.
- ✧ Quick Coupling: Plug-in, connection and disconnection is easy. It can be divided into barbed quick coupling and pneumatic quick coupling in terms of connection types.
 1. Barbed Quick Couplings: The couplings consist of a plug and a socket. The plug and socket can be installed and removed by a clip-on device.
 2. Pneumatic Quick Couplings: The connector will grip the outer diameter of flexible tubing to make it sealed. It is suitable for semi-rigid tubing such as PU tubing.

2. Material Properties

PP	Polypropylene is a polymer made from the combination of propylene monomers. It is transparent and light. It can withstand corrosion of a variety of organic solvents such as acid, alkali, salt solution etc. at temperature below 80°C. It is FDA-approved and UL compliant material. Applicable temperatures range from 13 °C to 66°C
PA	It can be disinfected by gamma ray; the color will be changed to some extent if disinfected by high-dose gamma ray. It is quite suitable for high temperature sterilization. The material may have slight swelling with long immersion. Applicable temperature range: -10°C ~ 135°C
PVDF	Kynar® PVDF is a fluorinated thermoplastic homopolymer that complies with FDA and USP Class VI standard. It can be disinfected by gamma ray; the color will be changed to some extent if disinfected by high-dose gamma ray. Applicable temperature range: -27°C ~ 108°C
POM	POM is a polyformaldehyde (POM) copolymer that compliant with UL. It is good in chemical stability, excellent in wear resistance and rigidity at high temperature. Applicable temperature range: -20°C ~ 60°C
ETFE	A resin for special purpose with hydrolysis stability and weather resistance, excellent wear resistance and chemical resistance. Applicable temperature range: -80°C ~ 150°C
PEEK	High performance thermoplastic materials, 30% carbon fiber reinforced polyetheretherketone (PEEK), complying with FDA food contact standard. It is for high strength and stiffness application in static or dynamic system. It is with high wear resistance, low coefficient of friction, thermal expansion, and high corrosion resistance. Applicable temperature range: -27°C ~ 100°C
PPS	A polyphenylene sulfide PPS that filled with 40% glass reinforced material. It has high strength, high toughness, excellent heat and chemical resistance, good electrical properties and inherent flame retardance. The high hardness and rigidity at elevated temperatures allows for good load bearing performance. Applicable temperature range: -50°C ~ 150°C
PTFE	With excellent properties of typical fluoroplastic resin, it has characteristic of high tension, chemical resistance and low friction. Applicable temperature range: -50°C ~ 100°C
TPU	With excellent high tension, tenacity and aging resistance, it is a mature environmental material. Applicable temperature range: -27°C ~ 80°C

Note: The material mentioned above all meet RoHS 2.0 compliant.

3. Model Interpretation

Barb Style

Mark	F	C	D	V
Figure				
Value	400 series	Classic series	200 series	500 series
expansion ratio	25%	42 ~ 69%	50%	/

e. g. BY-16F-PP-N refers to Y style barbed connector (400 series barb) 1.6mm ID Tubing, PP material, Natural.

Note: the default 200 series mark are omitted.

Thread

Mark	M5	M6	U28	U32	U40	G1/8	1/4NPT	1/8NPT
Thread	M5x0.8	M6x1	1/4-28UNF	10-32UNF	6-40UNF	G1/8	1/4-18NPT	1/8-27NPT

e. g. SAL-U32-24D-PP-N refers to Elbow Thread to Barb Connector (200 series barb) with 10-32UNF thread, 2.4mm ID Tubing, PP, Natural.

Material

Mark	PP	PA	AC	PE	PV	ET	PU	PT	SS
Material	PP	Nylon	POM	PEEK	PVDF	ETFE	TPU	PTFE	SUS

e. g. SB-M6-40-AC-B refers to Straight Through Thread to Barb Connector (200 series barb) with M6x1 thread, 4.0mm ID tubing, POM material, Black.

Color

Mark	N	Y	R	G	U	W	B	O
Color	Natural	Yellow	Red	Green	Blue	White	Black	Orange

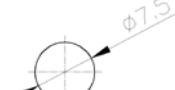

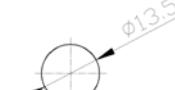

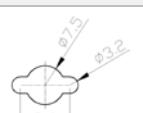

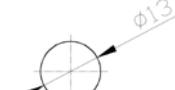

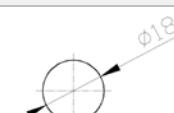

e. g. LPT-PA-O refers to Finger Snap Luer Lock Ring, PA material, Orange.

Recommended Torque by Thread

Thread	6-40UNF	10-32UNF	1/4-28UNF	M5*0.8	M6*1	1/8-27NPT	1/4-18NPT	G1/8
Torque/N·m	0.08 ~ 0.16	0.25 ~ 0.3	0.25 ~ 0.3	0.25 ~ 0.3	0.25 ~ 0.3	0.25 ~ 0.3	0.25 ~ 0.3	0.25 ~ 0.3

Note: The above torques are recommended for regular fittings. The specialized connection of PEEK VHP Fittings, metal fittings, please consult the supplier for detailed torque.

Punch Hole & Thickness

Model	PMB Panel Mount Barb Connector	PMU Panel Mount Union	PMLS Panel Mount Female Luer	Q20 Series Quick Coupling	Q40 Series Quick Coupling
Punch Hole (mm)	 Diameter: 6.4~7.5	 Diameter: 12.5~13.5	 Diameter: 6.4~7.5	 Diameter: 12.7~13	 Diameter: 17.5~18
Max Panel Thickness (mm)	3.5	7.5	3.5	Plug: 3.3 Shoket: 8.5	Plug: 5.5 Shoket: 11.5

4. H-Fittings for Rigid Tubing

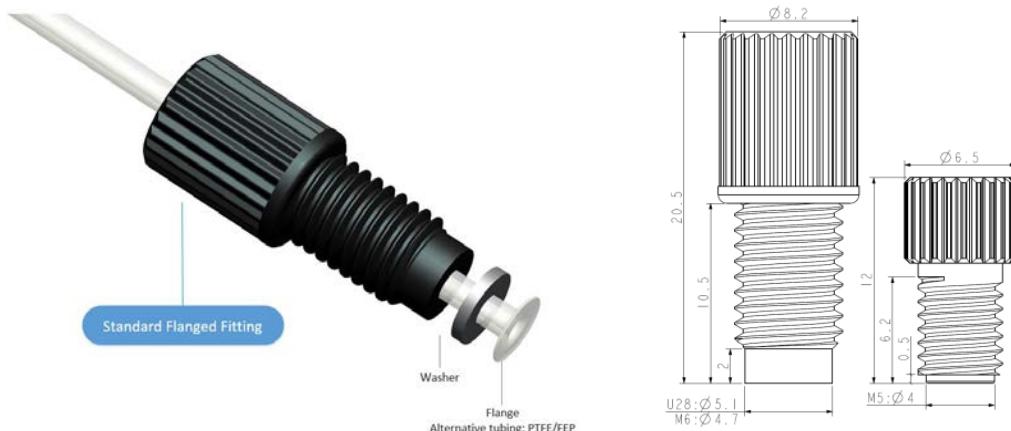

4.1 HF- Standard Flanged Fitting

Feature

To make the tubing end into flange edge with specialized tool. The tubing will not be twisted if the fitting is rotated; thereby there will be no gas leakage caused by tubing twisting. Screw in the fitting with flange edge to form a seal, the wetted part is tubing.

- Applied to rigid tubing (e.g. PTFE, FEP tubing) with OD: 1.6mm, 2.0mm, 2.5mm, 3.0mm, 3.2mm
- Alternative thread: 1/4-28UNF, M6, M5

Illustration

Note: The outline dimension is shown above.

Model Interpretation

E. g.

HFL-U28-16-PV-N refers to Standard Flanged Fitting, 1/4-28UNF thread, 1.6mm OD Tubing, PVDF, Natural

Tubing assemblies

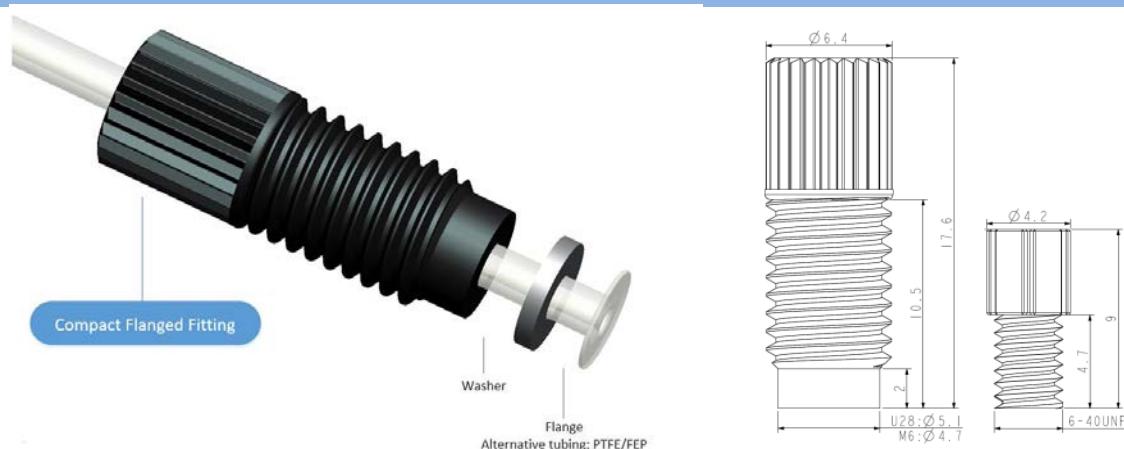

4.2 HF6-Compact Flanged Fitting

Feature

Compact flange fitting is suitable for installation in limited space. To make the tubing end into flange edge with specialized tool. The tubing will not be twisted if the fitting is rotated; thereby there will be no gas leakage caused by tubing twisting. Screw in the fitting with flange edge to form a seal, the wetted part is tubing.

- Applied to rigid tubing (e. g. PTFE, FEP tubing) with OD: 1.6mm, 2.0mm, 2.5mm, 3.0mm, 3.2mm
- Alternative thread: 1/4-28UNF, M6, 6-40UNF

4.4 HN-Standard Flangeless Fitting

Feature

The fitting is economic and durable. To slip the fitting and ferrule over the tubing and finger tighten the assembly into your receiving port. The standard flangeless fitting is used together with ferrule.

- Applied to rigid tubing (e. g. PTFE, FEP tubing) with OD: 1.6mm, 2.0mm, 2.5mm, 3.0mm, 3.2mm
- Installing without any specialized tool
- Alternative Thread: 1/4-28UNF, M6

4.7 HSF6-Compact Clamp Ring Flangeless Fitting Kit

Feature

Clamp ring flangeless fitting kit consists of three parts: clamp ring, ferrule, clamp ring flangeless fitting. Should be used cooperatively with clamp ring or flanged ferrule.

It is suitable for installing with specialized tool in small space. It is an interference fit and the parts will squeeze each other to form seals.

- Applied to rigid tubing (e. g. PTFE, FEP tubing) with OD: 1.6mm, 2.0mm, 2.5mm, 3.0mm, 3.2mm
- Can be dismantled and disassembled repeatedly
- Alternative thread: 1/4-28UNF, M6

5. P-VHP Fitting

Feature

- Installing without specialized tool. The extrusion between pyramidal face makes a reliable sealing
- Application: high-pressure hydraulic fittings and connectors (e.g. HPLC, UHPLC, UPLC, NanoLC, etc.)
- Compression resistance properties: 30 MPa
- Alternative thread: 10-32UNF

Illustration

Note: the outline drawing of 10-32UNF is shown above; diameter of bore is the tubing OD .

6. B-Barbed Connector

6.1 BA-Straight Through

Feature

- Use for connection between flexible tubing.
- Alternative material: PP, PA

Illustration

Note: Please consult the supplier for drawings of relevant dimension

Model Interpretation

Note:

1. Explanation of the letter after tubing ID
 - 1) F: Semi-rigid tubing (e.g. PU tubing) is recommended
 - 2) the others: flexible tubing (e.g. TPE tubing, PVC tubing, silicon tubing, etc.) is recommended
2. Model reduct rules:
 - 1) reduction barbed connection: orders of tubing size from small to large. E.g. BA-16-32-PP-N
 - 2) equal diameter barbed connector: omit to single size. E.g. BA-16-16-PP-N to BA-16-PP-N

E.g.

BA-32F-64F-PP-N, straight through reduction barbed connector, tubing ID of barb1 is 3.2mm, tubing ID of barb2 is 6.4mm, PP, natural.

6.2 BL-Elbow

Feature

- Alternative material: PP, PA

Illustration

Note: Please consult the supplier for drawings of relevant dimension

Model Interpretation

B

Barbed connector

L

Elbow

16D

 Barb1 tubing ID
 16 - 1.6mm
 24 - 2.4mm
 32 - 3.2mm
 40 - 4.0mm
 48 - 4.8mm
 64 - 6.4mm
 79 - 7.9mm
 95 - 9.5mm
 127 - 12.7mm

32D

 Barb1 tubing ID
 16 - 1.6mm
 24 - 2.4mm
 32 - 3.2mm
 40 - 4.0mm
 48 - 4.8mm
 64 - 6.4mm
 79 - 7.9mm
 95 - 9.5mm
 127 - 12.7mm

PP

 Material
 PP - polypropylene
 PA - Nylon

N

 Color
 N - Natural
 W - White

Note:

1. Explanation of the letter after tubing ID

1) F: Semi-rigid tubing (e.g. PU tubing) is recommended

2) the others: flexible tubing (e.g. TPE tubing, PVC tubing, silicon tubing, etc.) is recommended

2. Model reduct rules:

1) reduction barbed connection: orders of tubing size from small to large. E.g. BL-16-32-PP-N

2) equal diameter barbed connector: omit to single size. E.g. BL-16-16-PP-N to BL-16-PP-N

E.g.

BL-16-32-PP-N, elbow reduction barbed connector, tubing ID of barb1 and barb2 are 1.6mm and 3.2mm respectively, PP, natural

6.3 BY-Y Type

Feature

- Y Barbed Connector for flexible tubing, including equal diameter and reducer
- Alternative material: PP, PA

Illustration

Note: Please consult the supplier for drawings of relevant dimension

Model Interpretation

Note:

1. Explanation of the letter after tubing ID
 - 1) F: Simi-rigid tubing (e.g. PU tubing) is recommended
 - 2) the others: flexible tubing (e.g. TPE tubing, PVC tubing, silicon tubing, etc.) is recommended
2. Order of dimension: Barb 1, 2 and 3 can be found in the dimension figure.

E.g.

- a. BY-32F-PP-N, Y type barbed connector, tubing ID 3.2mm, PP, natural;
- b. BY-24F-16F-16F-PP-N, Y type reduction barbed connector, tubing ID of barb1, 2 and 3 are 2.4mm, 1.6mm and 1.6mm respectively, PP, natural

9. S-Thread to Barb Connector

9.1 SA-Male Thread to Barb Connector

Feature

- Straight through and elbow type male thread to barb connector. Thread tape, thread locker is required for sealing.
- Threaded sealing
- Alternative material: PP, PA, PVDF

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

Note:

1. Explanation of the letter after tubing ID
1) F: Semi-rigid tubing (e.g. PU tubing) is recommended
2) the others: flexible tubing (e.g. TPE tubing, PVC tubing, silicon tubing, etc.) is recommended

E.g.

SAL-U32-16F-PP-N, Elbow thread to barb connector, 10-32UNF, tubing ID 1.6mm, PP, natural

9.2 SB- Male Thread to Barb Connector

Feature

- There is a step surface at end of male thread which will be in contact with bottom of male thread to form a seal by threaded extrusion.
- Bottom sealing
- Alternative material: PP, PA

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

Note:

- Explanation of the letter after tubing ID
 - F: Simi-rigid tubing (e.g. PU tubing) is recommended
 - the others: flexible tubing (e.g. TPE tubing, PVC tubing, silicon tubing, etc.) is recommended

E.g.

SB-U28-16-PP-N, straight through thread to barb connector, 1/4-28UNF, tubing ID1.6mm, PP, natural

9.3 SC-Female Thread to Barb Connector

Feature

- Apply to connect between male threaded fitting and flexible tubing.
- 1/4-28UNF female thread & PP material
- Matching for tubing with ID of 1.6mm, 2.4mm, 3.2mm

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

E.g.

SC-U28-16-PP-N, Female thread to barb connector, 1/4-28UNF, tubing ID 1.6mm, PP, natural

Ordering Information

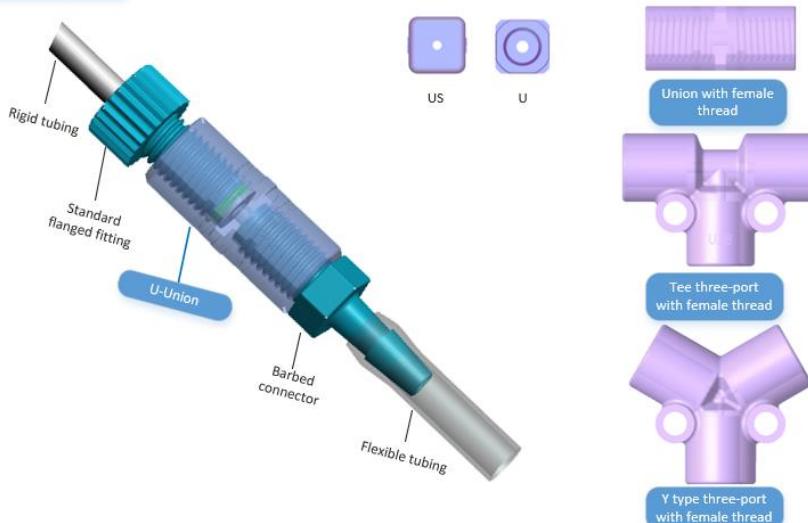

Part No.	Model	Thread	Tubing ID /mm	Material	Description
809522	SC-U28-16D-PP-N	1/4-28UNF	1.6	PP-Natural	Female Thread to Barb Connector SC-U28-16D-PP-N 809522

10. U-Union

Feature

- Connector between male and female threaded fitting. It achieves leak-free connection between rigid tubing connection system and flexible tubing connection system
- Alternative material: POM, PP, PPS
- Alternative thread: M6, 1/4-28UNF, 6-40UNF

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

U - U28 - M6 - 20 - AC - B

U-Union
 U - union with female thread
 US - Squared union with female thread
 UT - Tee three-port with female thread
 UY - Y type three-port with female thread

Thread 1
 M6 - M6×1
 U28 - 1/4-28UNF

Thread 2
 M6 - M6×1
 U28 - 1/4-28UNF

Diameter
 05 - 0.5mm
 10 - 1.0mm
 15 - 1.5mm
 20 - 2.0mm

Material
 PP - PP
 AC - POM
 PS - PPS

Color
 N - Natural
 B - Black

Note: the thread of U series is female thread. For female thread to male thread union, thread type of female should be written first. The letter M after thread indicates male thread.

E.g.

U-U28-M6-20-AC-B, union with female thread, female thread 1/4-28UNF to female thread M6, diameter 2.0mm, POM, black

11. PMU-Panel Mount Union

Feature

- Connector between male and female threaded fitting. It achieves leak-free connection between rigid tubing connection system and flexible tubing connection system.
- Alternative material: POM, PP, PPS
- Alternative thread: M6, 1/4-28UNF, 6-40UNF

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

e.g.

PMU-M12-U28-20-PP-N, Panel Mount Union, Male Thread M12X1, Female Thread 1/4-28UNF, diameter 2.0mm, PP, Natural

Ordering Information

Part No.	Model	Male Thread	Female Thread	Material	Description
809525	PMU-M12-U28-20-PP-N	M12x1	1/4-28UNF	PP-Natural	Panel Mount Union PMU-M12-U28-20-PP-N 809525
809595	PMBSN-M12-SS-N	M12x1	/	SUS-Natural	Panel Mount Lock Nut PMBSN-M12-SS-N 809595

Note: The Union should be used together with lock nut

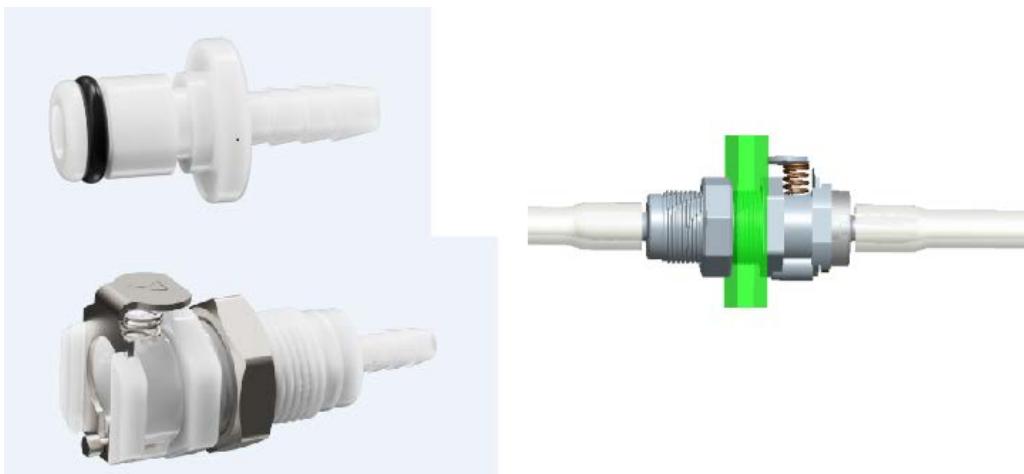

12. QL-Quick Coupling

12.1 Q20 Series

Feature

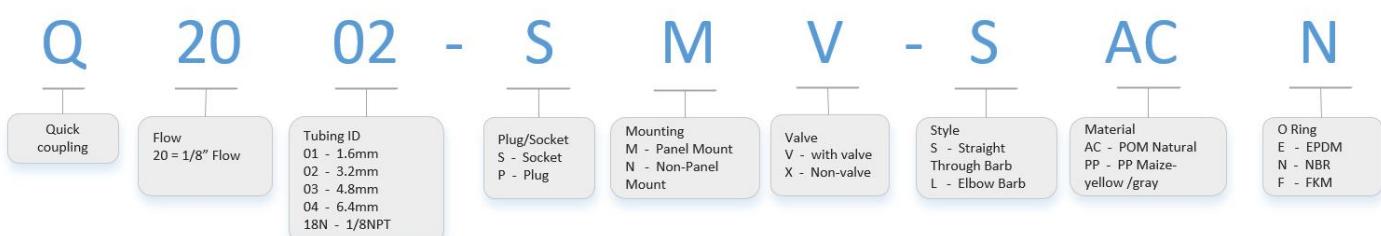

- The quick couplings are made of polyformaldehyde, it is durable and reliable and compatible with mild chemicals. The switch button enables one-hand connection/disconnection, and the couplings will make a click sound after well connected
- The quick couplings are divided into Q20 series with 1/8" diameter and Q40 series with 1/4" diameter according to the flow, which are compatible with CPC PMC/PLC series and Link Tech AC20/AC40 series

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

Note: the style ,O ring is default SACN (Straight Through Barb, POM, EPDM O ring) which is omitted in the model

E.g.
Q2002-SMV-SACN refers to Valved Quick Coupling Socket with 1/8" Flow, 3.2mm ID tubing, straight through barb, Panel Mount; POM, NBR O ring

12.2 Q40 Series

Feature

- The quick couplings are made of polyformaldehyde, it is durable and reliable and compatible with mild chemicals. The switch button enables one-hand connection/disconnection, and the couplings will make a click sound after well connected
- The quick couplings are divided into Q20 series with 1/8" diameter and Q40 series with 1/4" diameter according to the flow, which are compatible with CPC PMC/PLC series and Link Tech AC20/AC40 series

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

Q	40	06	-	S	M	V	-	S	AC	N
Quick coupling	Flow 40 = 1/4" Flow	Tubing ID 04 - 6.4mm 05 - 7.9mm 06 - 9.5mm 14N - 1/4NPT		Plug/Socket S - Socket P - Plug	Mounting M - Panel Mount N - Non-Panel Mount	Valve V - with valve X - Non-valve		Style S - Straight Through Barb L - Elbow Barb	Material AC - POM Natural PP - PP Malze-yellow /gray	O Ring E - EPDM N - NBR F - FKM

Note: the style ,O ring is default SACN (Straight Through Barb, POM, EPDM O ring) which is omitted in the model

E. g.
Q4006-SMV-SACN refers to Valved Quick Coupling Socket with 1/4" Flow, 9.5mm ID tubing , straight through barb, Panel Mount; POM, NBR O ring

12.3 Q60 Series

Feature

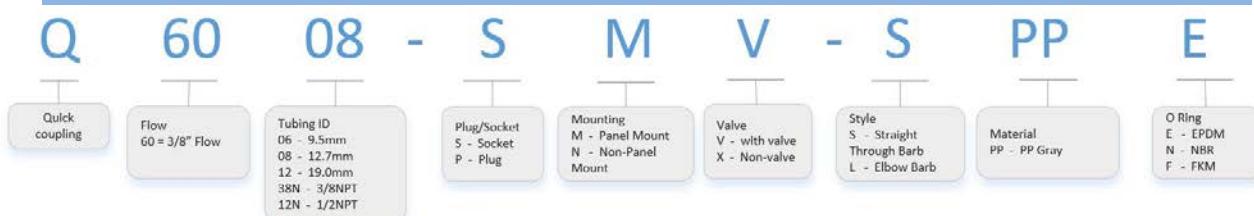

- The quick couplings are made of polyformaldehyde, it is durable and reliable and compatible with mild chemicals. The switch button enables one-hand connection/disconnection, and the couplings will make a click sound after well connected
- The quick couplings are divided into Q20 series with 1/8" diameter and Q40 series with 1/4" diameter according to the flow, which are compatible with CPC PMC/PLC series and Link Tech AC20/AC40 series

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

Note: the style, material, O ring is default SACN (Straight Through Barb, POM, EPDM O ring) which is omitted in the model

E. g.
Q6008-SNV-SPPE refers to Valved Quick Coupling Socket with 3/8" Flow, 12.7mm ID tubing, straight through barb, Non-Panel Mount; PP, NBR O ring

13. L-Luer Fitting

13.1 LP-Male Luer

Feature

- Plug-in fitting. Usability for the connection between flexible tubing
- Alternative style: swiveling, stationary, and integrated
- Alternative material: PP, PA, PVDF

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

Model Interpretation

LPR - 32 - PP - N

Luer Fitting
LPR - Male Luer Swivel Lock
LPS - Male Luer Stationary Lock
LP - Male Luer Integral lock ring

Tubing ID
16 - 1.6mm
24 - 2.4mm
32 - 3.2mm
40 - 4.0mm
48 - 4.8mm
64 - 6.4mm

Material
PP - PP
PA - PA
PV - PVDF

Color
N - Natural
Y - Yellow
R - Red
G - Green
U - Blue
W - White
B - Black
O - Orange

*Note: the Finger Snap Luer Lock Ring of Male Luer Swivel Lock is rotatable
the Finger Snap Luer Lock Ring of Male Luer Stationary Lock is Un-rotatable

E. g.
LPR-U28-32-PP-N refers to Male Luer Swivel, 1/4-28 UNF thread, 3.2mm ID tubing,
PP, Natural

13.2 LS-Female Luer

Feature

- Plug-in fitting. Usability for the connection between flexible tubing
- Alternative style: panel mounting, non-panel mounting
- Alternative material: PP, PA, PVDF

Illustration

Note: Please consult the supplier for drawings of relevant dimension.

17. Rigid Tubing-Fluoroplastics Tubing

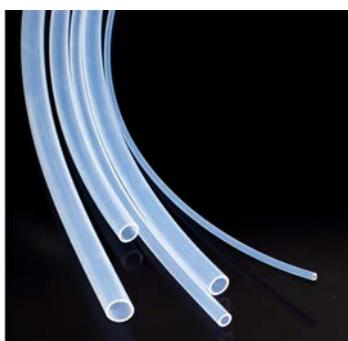

17.1 PTFE (Polytetrafluoroethylene) Tubing

Overview

PTFE, known as the King of Plastic, stands for polytetrafluoroethylene. It is provided with chemical stability, corrosion resistance, tightness, high lubrication and non-stick, specializing in electrical insulation, aging resistance and noninflammability. The PTFE material itself is non-toxic.

Feature

- ◆ Noninflammability
- ◆ Chemically resistant and inert
- ◆ Slippery surface & non-stick
- ◆ High pressure resistance
- ◆ Tight dimensional tolerance

Data Sheet

Properties	ASTM Method	Nominal Value
Density	D792	2.15
Hardness (Shoe A)	Durometer	D50 ~ D65

17.2 FEP (Fluorinated ethylene propylene) Tubing

Overview

FEP is a copolymer of tetrafluoroethylene and hexafluoropropylene. It is a modified material of polytetrafluoroethylene with similar properties and good processing performance of thermoplastic. Similarly, FEP is also characterized in excellent electrical insulation, high atmospheric, and stability. The irradiation resistance of FEP is better than PTFE.

Feature

- ◆ Wide temperature range, high-performance at low temperature
- ◆ Chemically resistant and inert
- ◆ Slippery surface & non-stick
- ◆ High pressure resistance
- ◆ Tight dimensional tolerance & aging resistance
- ◆ UV-resistant

Data Sheet

Properties	ASTM Method	Nominal Value

17.3 PU Tubing

Overview

PU material, namely polyurethane. It is specialized in chemical corrosion resistance, light weight, high wear resistance, anti-dyeing, anti-swelling and other properties with low performance in high temperature resistant and aging-resistant. It is mostly used for air pipes, water pipes and material transfer tubing.

Feature

- ◆ High consistency of tear resistance
- ◆ Optimal bending radius
- ◆ Good vibration resistance
- ◆ High wear resistance
- ◆ UV-resistant
- ◆ Excellent vacuum performance
- ◆ Suitable for application of pneumatic circuit

Data Sheet

Properties	ASTM Method	Nominal Value

18.1 PVC Tubing

Overview

When treated with certain catalysts, vinyl chloride monomers undergo polymerization and form the larger compound known as polyvinyl chloride (PVC). PVC tubing has good flexibility, chemical compatibility and some other characteristic, thus it is transparent, therefore it is widely used in medical, food, beverage industries etc.

Feature

- ◆ Smooth inner wall, transparent and soft
- ◆ Crack-resistant and durable
- ◆ Anti-oxidation, anti-pollution
- ◆ No phthalates
- ◆ Excellent chemical compatibility
- ◆ Easy insert and unplug, reliable connection
- ◆ High vacuum resistance

Data Sheet

Properties	ASTM Method	Nominal Value
Hardness (shore A)	D2240-02	55/65
Color	-	Transparent
Specific Gravity	D792-00	1.15
Tensile strength (MPa)	D412-98	12
Tearing strength (kN/m)	D1004-94	32
Max. elongation (%)	D412-98	390
Compression set (%)	D395-01 方法 B	59
Tensile set (%)	D412	57
Water Absorption (%)	D1004-94	0.3
Maximum Operating Temp (°C)	-	74
Glass transition temp (°C)	D746-98	-36

Ordering Information

Part No.	Material	Working Pressure(23°C)	Hardness (ShoreA)	Tubing ID/mm	Tubing OD/mm	Model
438001	PVC	2.5bar	55	1.6mm	3.2mm	M3600-16-32-30M
438002	PVC	2.0bar	55	2.0mm	4.0mm	M3600-20-40-30M
438003	PVC	1.7bar	55	2.4mm	4.0mm	M3600-24-40-30M
438004	PVC	2.5bar	55	3.2mm	6.4mm	M3600-32-64-30M
438006	PVC	2.0bar	55	4.0mm	7.1mm	M3600-40-71-30M
438005	PVC	2.5bar	55	4.8mm	7.9mm	M3600-48-79-30M
438008	PVC	1.4bar	55	6.4mm	9.5mm	M3600-64-95-15M
438009	PVC	1.4bar	55	9.5mm	14.3mm	M3600-95-143-15M
439001	PVC	3.0bar	65	1.6mm	3.2mm	E3600-16-32-30M
439002	PVC	2.5bar	65	2.0mm	4.0mm	E3600-20-40-30M
439003	PVC	2.0bar	65	2.4mm	4.0mm	E3600-24-40-30M
439004	PVC	3.0bar	65	3.2mm	6.4mm	E3600-32-64-30M
439006	PVC	3.0bar	65	4.0mm	7.1mm	E3600-40-71-30M
439005	PVC	2.0bar	65	4.8mm	7.9mm	E3600-48-79-30M
439009	PVC	2bar	65	6.4mm	9.5mm	E3600-64-95-15M
439010	PVC	2.5bar	65	7.9mm	12.7mm	E3600-79-127-15M
439011	PVC	2bar	65	9.5mm	14.3mm	E3600-95-143-15M
439014	PVC	1.7bar	65	11.1mm	15.9mm	E3600-111-159-15M
439012	PVC	2bar	65	12.7mm	19.1mm	E3600-127-191-15M

**We sincerely thank you for choosing our products,
Foreach will provide you with the best service.**
