About Us

Longer Precision Pump Co., Ltd, was founded in 1997, and is a wholly owned subsidiary of the Halma Group, and is affiliated to Healthcare Sector which specializes in R&D, production and the sale of precise fluid transfer and handling devices.

Longer has always persisted on customer orientation, and we provide our customers with safe, high accuracy and quality fluid transfer devices and solutions. Our products not only include peristaltic pumps, laboratorial syringe pumps, industrial syringe pumps, micro-gear pumps, dispensing and filling systems, etc., which can also be customized and designed to OEM pumps according to the clients' different needs. Longer has more than 40 series of products with over 600 specifications. We are hyper-focused on the quality, delivery, value and technology of products and services, and provide products and services for the Pharmaceutical, Medical, Environmental monitoring and Laboratory fields, etc.

All of our products are produced with the most advanced manufacturing equipment and testing devices under the assurance of ISO9001:2015. Additionally, we have set up Research Centres in Baoding and Shanghai with branches in the United States. We serve customers in more than 130 countries and territories through diversified marketing channels.

Halma is a global group of life-saving technology companies. Named as one of Britain's Most Admired Companies, with group of around 45 companies provide innovative products and services that help solve many of the key problems facing the world today. Halma employs over 7,000 people in more than 20 countries, with major operations in the UK, Mainland Europe, the USA and Asia Pacific. Halma is listed on the London Stock Exchange and is a constituent of the FTSE 100.

Halma's purpose is to grow a safer, cleaner, healthier future for everyone, every day.

Peristaltic Pump Features

Non-contamination, easy to clean, low shear, simple maintenance

Peristaltic Pump Working Principle

Laboratorial Syringe Pump Configuration

Laboratorial Syringe Pump Features

High accuracy, diversification, laboratory use only

Laboratorial Syringe Pump Working Principle

Industrial Syringe Pump Configuration

Industrial Syringe Pump Features

Intelligent, high accuracy, embedded installation and OEM use only

Industrial Syringe Pump Working Principle

Gear Pump Configuration

Gear Pump Features

Low pulse constant flow rate, higher pressure than peristaltic pump

Gear Pump Working Principle

Piston Pump Configuration

Piston Pump Features

High accuracy, compact size, non-worn and long life

Piston Pump Working Principle

Biosicon®Silicone Tubing

◎ Main Features

BioSicon silicone tubing is based on Longer's years of research and application experience in fluid transfer and process technology with peristaltic pump, and made of refined silicone polymer. It has high transparency, good wear resistance, low permeability, strong restitutional resilience, and is not easy to deform after compression, which is the optimal tubing for peristaltic pumping applications.

- >USP<88> Class VI
- >USP<87> Requirement
- >USP<85>Endotoxins <0.25EU/mL
- >FDA regulations 21CFR 177.2600
- >NSF 51
- >ROHS
- >REACH

◎ Typical Applications

- Media addition
Ultrafiltration and concentration
IVD reagent dispensing and filling
Media filling
Coolant transfer
- Fermentation control
Oral liquids filling
Vaccine filling
Buffer transfer
Saline transfer

Double-bagged,
following GMP guidelines

Lot-traceable and accompanied by
documentation to make the
validation easy

◎ Tubing Specification

Product Code	Tubing Size	ID (mm)	OD (mm)	Wall Thickness (mm)	Length (m/pkg)	Hardness (Shore A)	Tensile Strength (MPa)	Elongation at Break (%)	Tear Strength (kN/m)	Material
05.50.741	14#	1.6	5	1.7	15	50-55	≥7.0	≥500	≥30	Platinum-cured silicone

05.50.764	187#	16	24	4	15	50-55	≥7.0	≥500	≥18	
05.50.765	188#	17	25	4	15	50-55	≥7.0	≥500	≥18	

Temperature range: -50°C to 250°C. Can be sterilized repeatedly by high temperature and ultraviolet.

Easy-load Pump Head

YZ1515x, YZ2515x

Classic design, simple operation, wide flow range.

PPS housing
(Excellent chemical resistance)

YZII15, YZII25

Patented Design
Patent Number: 200620026529.1

Based on the classic design of YZ1515x/YZ2515x, YZII15/YZII25 have a special tubing retention linkage which makes tubing loading easily and rapidly. YZII25 accepts more suitable tubing than YZ2515x and provides a wider flow range.

Tubing Loading Comparison

Tubing clamber needs to be lifted manually
YZ1515x/YZ2515x

Tubing clamber can be automatically opened
YZII15/YZII25

Model	Product Code	Roller Number	Roller Material	Housing Material	Speed (rpm)	Tubing	Max. Flow Rate (mL/min)	Weight (kg)
YZ1515x-A	05.01.52A	3	Stainless steel	PESU	≤600	13" 14" 19" 16" 25" 17" 18"	2200	0.4

Easy-load Industrial Pump Head

YZ35-13

Product Code
05.01.58A(Long shaft)
05.01.58B(Short shaft)

Mainly for industrial applications

Two tubing retention modes

- Continuous tubing
- Tubing with fittings

Occlusion Adjustment

① Standard position

② Decrease occlusion

③ Increase occlusion

For continuous tubing

For tubing with fittings

Tubing Fitting Assembly

Model	Shaft	Product Code	Roller Number	Roller Material	Housing Material	Speed (rpm)	Tubing	Max. Flow Rate (mL/min)	Weight (kg)
YZ35-13-A	Long	05.01.58A	3	Stainless steel	PSU	≤600	73" 82"	11000	1.65
YZ35-13-B	Short	05.01.58B							

Standard Pump Head

BZ Series

Original design, stable flow rate, each pump head accommodates a single size of tubing.

Flip-type Pump Head

FG15-13, FG25-13

Distinctive design, unique installation mode.

Model	Product Code	Roller Number	Roller Material	Housing Material	Speed (rpm)	Tubing	Max. Flow Rate (mL/min)	Weight (kg)
BZ15-13-A	05.01.01A	3	Stainless steel	PC	≤600	14"	150	0.31

dPOFLEX® Industrial Pump Head

- LPH has low pulsation design for high flow rate accuracy
- GPH has two tubing retention modes: continuous tubing and tubing with fittings
- GPH could be equipped with tubing leak sensor
- Both GPH and LPH are designed with open head sensor for enhanced operator safety

LPH with double tubing assembly for low pulsation pumping

LPH with continuous tubing for double channel pumping

Double tubing assembly for LPH

Tubing fitting assembly for GPH

Model	Product Code	Roller Number	Roller Material	Housing Material	Speed (rpm)	Tubing ID x Wall Thickness (mm)	Reference Max. Flow Rate (L/min)	Weight (Kg)

Intelligent Peristaltic Pump

L100-1F, L300-1F, L600-1F

- 7 inch color display, full touch screen and intuitive graphic interface, provide easy-to-use operations
- Customize parameters by programming, and the parameter methods can be stored and easily recalled
- Multiple function modules and intelligent algorithms are designed for a wide variety of applications, including routine and multi-step complex applications
- Pump can be controlled through touch screen, foot switch, analog signal and communication commands, combined with a variety of interfaces (USB, RJ11, DB9 etc.) for easy system connection

Parameter Program Configuration

Running Control Module

Upgrade the pump software through PC

	L100-1F	L300-1F	L600-1F
Speed	≤100rpm, CW/CCW	≤300rpm, CW/CCW	≤600rpm, CW/CCW
Speed resolution	0.1rpm	0.1rpm resolution when speed <100rpm, 1rpm resolution when speed ≥100rpm	
Flow rate	0.15uL/min-500mL/min	0.15uL/min-1500mL/min	0.15uL/min-3000mL/min
Dispensing volume	0.1mL-9999L(accuracy of ±2% with calibration)		
Calibration	Improve the flow rate and dispensing volume accuracy.		
Display	7Inch 1024×600 color LCD		
Language	Chinese or English, set as needed		
Control mode	Touch screen control, footswitch control, external signal control and communication control		
Work mode	Programming		
Programming function	Running control module: constant, ramp up/down, stepped up/down, sine, constant dispensing, incremental/decremental dispensing. Logic control module: direction, delay, event trigger, status output, pause, jump, loop, stop. Configure multi-step program with multiple modules for complex application		
External control	Start/stop control, direction control: logic level signal or switch signal(dry contact) Speed control: 0-5V, 0-10V, 4-20mA or 0-10kHz with uniform interface, max speed can be set.		
Communication control	USB or RS485(RJ11) interface, Modbus protocol, multiple baud rate (1200/ 2400/ 4800/ 9600/ 19200/ 38400bps)		
Status output	Output logic level signals to indicate pump running status, direction status, and other custom status.		
Parameter method function	7 parameter methods can be stored and easily recalled, 1 external control method is preset		
Scheduled start	The delay start time can be set, and the pump will start running at desired time.		
Back suction	Antidrip through setting back suction angle and delay time for high dispensing accuracy		
Dispensing volume setting range	0.001uL-9999L		
Dispensing time and Interval time	0.5s-9000s		
Dispensing cycle	1-999999(0 for unlimited)		
Time in fluid transferring modules	1s-9000s (0s for continuous transfer without time limit)		
Delay time setting range	0.5s-9000s		
Prime	Fast filling and emptying at full speed		
EMC	Comply with EN 61326-1:2013		
Dimension (L×W×H)	294×180×235(mm)		
Power Supply	L100-1F-A/L300-1F-A: AC220V±20%, 50Hz/60Hz L100-1F-B/L300-1F-B: AC110V±20%, 50Hz/60Hz		AC100V-240V, 50Hz/60Hz
Power Consumption	35W	55W	100W
Condition	temperature: 0°C-40°C relative humidity: <80%		
IP rating	IP31		
Weight	5.0kg

Basic Peristaltic Pump

L100-1E

Professional Assistant in Your Lab
With a variety of color options

Speed	0.1rpm-100rpm, CW/CCW
Speed resolution	0.1rpm
Display	5-digit LED display for current speed, direction and run/stop status
Control Mode	Keypad control with physical buttons
Speed adjust function	Increase or decrease pump speed through physical buttons, and the automatic function is more convenient for speed adjustment
Prime	Fast filling or emptying at full speed
Power-off memory	Return to previous status when power on
EMC	Comply with EMC Directive 2014/30/EU
Dimension(L×W×H)	197mm×110mm×106mm
Power supply	AC 100V~240V (15W), 50~60Hz
Operating temperature	0°C~40°C
Relative humidity	<80%
IP rating	IP31
Weight	2.44kg

Compact Structure, small-foot print, save more space on your benchtop.
Concise function, easy operation, improve work efficiency.
Low vibration, low noise, offer a quiet and comfortable lab environment.
Metal housing with anti-corrosion paint treatment, prolong pump life time.
Good electromagnetic compatibility, ensure stable and reliable operation.

Pump Head Options

Basic Peristaltic Pump

BT100-3J

Speed	0.1rpm-100rpm, CW/CCW.
Speed resolution	0.1rpm
Control mode	Membrane keypad, external signal control and communication control are available
Display	3-digit LED display for current speed, 3 LED indicators for operating status
External control	Start/stop, direction and speed control (4-20mA, 0-5V, 0-10V, 0-10kHz external control module optional)
Communication interface	RS485
Power-off memory	Return to previous status when powered on
Prime	For fast filling and emptying at full speed
Dimension (L×W×H)	232×142×149 (mm)
Power supply	AC 100V-240V 50/60Hz
Operating temperature	0 to 40°C
Relative humidity	<80%
IP rating	IP20
Weight	2.3kg

Commonly used in
laboratorial applications

Pump Head Options

Basic Peristaltic Pump

JL350-2J

Mainly used in industrial applications.
AC motor, frequency control, high IP rating.
Combine special convex rollers with concave compression block to run stably and prolong tubing life.

Fluid transferring in industrial applications

Speed	30rpm-350rpm, CW/CCW
Speed resolution	0.6rpm
Control mode	keypad control or external signal control
Display	LCD for running information
Speed control	0-5V, 0-10V, 4-20mA linear control
Start/stop signal input	Switch signal control
Direction signal input	Switch signal control
Communication function	RS485 interface, Modbus RTU protocol
Memory function	Storing the running parameter automatically
Dimension (L×W×H)	417×401×321 (mm)
Power supply	AC 220V±10%/400W
Operating temperature	0 to 40°C
Relative humidity	<80%
IP rating	IP55(excluding frequency converter)
Weight	32kg

Tubing with fitting assembly

Tubing with fitting assembly can reduce cost.
Tubing with quick connect fitting assembly can provide a fast connection of fluid transfer line.

Flow Rates

Tubing Loading

1. Turn the knob ①、② counter clockwise.
2. Turn the hand wheel to loose the compression block.
3. Pull the knob ③ and take off the front cover.

4. Select suitable tubing slots, place the tubing between the roller and the compression block, then put the tubing in the corresponding tubing slots.

5. Pull the knob ③, insert the front cover, tighten the knob CW to fix the front cover ①.
6. Turn the hand wheel and adjust the occlusion between the roller and the compression block.
7. Tighten the knob ② and fix the compression block.

Model	Product Code	Pump Head	Tubing	Flow Rate (L/min)	Weight (kg)

			92"	3-35	

Basic Peristaltic Pump

BQ50-1J

Speed	1rpm-50rpm, CW/CCW
Speed resolution	1rpm (manually control), 0.1rpm (external control)
Control mode	Hand-held controller, external signal control and communication control are available
Display	Hand-held controller displays speed and running status
External control	Start/stop, direction and speed control (4-20mA, 0-5V, 0-10V, 0-10kHz external control module optional)
Communication	RS485
Power-off memory	Return to previous status when powered on
Prime	For fast filling and emptying at full speed
Dimension (L×W×H)	135mm×72mm×72mm (drive + pump head) 105mm×50mm×16mm (hand-held controller)
Power supply	DC 12V/10W (pump) AC 90V-260V/10W (adapter)
Operating temperature	0 to 40°C
Relative humidity	<80%
IP rating	IP31
Weight	0.5kg
Standard configuration	Drive with pump head, hand-held controller, adapter, data wire
Optional accessories (Order separately)	Small V-base, polished stainless steel pole, fixing plate, specific tubing

Model	Product Code	Color	Pump Head	Roller Number	Pump Head Material	Tubing	Max. Flow Rate (mL/min)	Weight (kg)
BQ50-1J-A	05.02.02A	Black	WX10-14-A	4	ABS, POM	ID ≤3.17 (mm) Wall Thickness 0.8-1 (mm)	20	0.5
BQ50-1J-B	05.02.02B		WX10-14-C		ABS, PVDF			
BQ50-1J-C	05.02.02C		WX10-18-A	8	ABS, POM			
BQ50-1J-D	05.02.02D		WX10-18-C		ABS, PVDF			

Mainly used in laboratorial applications.
Embedded or rack-mounted.

Installation Drawing

1. Insert pump into the mounting hole of user instrument.

2. Insert the clips into the slots of the pump housing.

3. Push the clips and fix the pump in user instrument.

Standard Peristaltic Pump

L100-1S-2

* Product L100-1S-1(product code:050241A) has same performance and parameters as L100-1S-2, but only can be controlled by keypad.

Speed	0.01rpm-100rpm, CW/CCW
Speed resolution	0.01rpm resolution within the speed of 0.01rpm-10rpm 0.1rpm resolution within the speed of 10rpm-100rpm
Display	LCD
Control mode	Keypad control, external signal control and communication control
Work mode	Speed control mode and flow rate mode
Flow rate mode	Flow rate is displayed and the pump runs continuously at the set flow rate
Flow rate calibration	Improve the flow rate accuracy
Flow rate setting range	0.01μL/min-999L/min, unit could be set as μL/min, mL/min or L/min
External control	Start/stop control (switch signal), direction control (switch signal), speed control (0-5V, 0-10V, 4-20mA, 0-10kHz are optional with uniform interface, from 0-10rpm in 0.01rpm resolution, from 10-100rpm in 0.1rpm resolution)
Communication control	RS485 interface, Longer protocol or Modbus protocol, the communication parameters (address, baud rate, parity, stop bit) can be set through keypad
Timing function	Set the running time (13 options), the pump could run/stop automatically
Parameter memory	Operating parameters will be saved automatically
Status when powered up	The pump status when powered up could be set as stop or as the status before power loss
Prime	Fast filling or emptying at full speed
Keypad lock function	Keypad can be locked to prevent the misoperation. The delay time before lock is settable.
Dimension(L×W×H)	232×142×149(mm)
Power supply	AC100V-240V/25W, 50/60Hz
Operating temperature	0 to 40°C
Relative humidity	<80%
IP rating	IP31
Weight	2.38kg

Mainly designed for Laboratory and light industry applications. With precise speed control in 0.01rpm resolution (10000:1 turndown ratio), and flow rate calibration function, the pump has more accurate and wider range of flow rate. With the intelligent fan control, the pump has lower noise and better energy efficiency. LCD with specially designed run screen displays parameters and running status, which provides enough information for correct operation.

Pump Head Options

Flow Rate Peristaltic Pump

LEAD-2

Speed	1rpm-100rpm, CW/CCW
Speed resolution	0.1rpm
Control mode	Control panel, external signal control and communication control are available
Display	128×32 graphic LCD for current running status
Calibration function	Improve flow rate accuracy
External control	Start/stop, direction and speed control (4-20mA, 0-5V, 0-10V, external control module optional)
Communication interface	RS485
Power-off memory	Return to previous status when powered on
Prime	For fast filling and emptying at full speed
Dimension (L×W×H)	190×162×275 (mm)

Industrial Peristaltic Pump

G100-2J

Using aluminium alloy housing with anti-corrosion paint treatment, the pump has good corrosive resistance and longer life time in corrosive environments. With good electromagnetic compatibility, the pump will not behave unacceptably in an EMI environment and will not interfere with other electronic equipment. Waterproof breathable design, enhanced sealing performance, IP65 protection for wet and dusty environment. Using high quality electronic components, optimized software design and circuit design, the pump provides long-term reliable and stable operation. LCD with specially designed run screen displays parameters and running status, which provides enough information for correct operation.

Industrial Peristaltic Pump

G300-2J/G600-1J

With good electromagnetic compatibility, the pump will not behave unacceptably in the EMI environment and will not interfere with other electronic equipment. Using aluminium alloy housing with anti-corrosion paint treatment, the pump has good corrosive resistance and longer life time in corrosive environment. Waterproof breathable design, enhanced sealing performance, IP65 protection for wet and dusty environment. LCD with specially designed run screen displays parameters and running status, which provides enough information for correct operation.

Pump Head Options

Specifications	Model	G300-2J	G600-1J
Speed Range		0rpm-300rpm, CW/CCW	0rpm-600rpm, CW/CCW
Speed resolution		1rpm	
Display		LCD	
Control mode		Keypad control, external signal control and communication control	
External control		Start/stop control, direction control: switch signal (dry contact). Speed control: 0-5V, 0-10V, 4-20mA, 0-10kHz are optional with uniform interface, and max speed can be set.	
Max speed setting range in external control mode		30rpm-300rpm	60rpm-600rpm
Communication Control		RS485 interface, Longer protocol or Modbus protocol, the communication parameters (baud rate, parity, stop bit) can be set through keypad	
Parameter memory		Operating parameters will be saved automatically	
Pump state when power up		The pump state when power up could be set as stop or as the state before power loss	
Prime		Fast filling or emptying at full speed	
EMC		Comply with EMC Directive 2014/30/EU	
Keypad lock function		Keypad can be locked to prevent the misoperation	
Dimension(L x W x H)		240mm x 142mm x 152mm	240mm x 211mm x 155mm (including the external power supply and mounting bracket)
Power supply		AC100V-240V/60W, 50/60Hz	AC100V~240V/100W, 50/60Hz
Operating temperature		0°C~40°C	
Relative humidity		10%~90%	
IP rating		IP65	
Weight		3.64kg	5.56kg(including the external power supply and mounting bracket)

Industrial Peristaltic Pump

G300-3F

Industries have very wide demands for peristaltic pumps. But industry applications have more restrict requirements, such as higher IP rating, better chemical resistance, better reliability, and good electromagnetic compatibility. Longer Pump provides professional peristaltic pump solutions for industry applications, to meet the industrial fluid transferring and handling requirements.

- Using aluminium alloy housing with anti-corrosion paint treatment, the pump has good corrosive resistance and longer life time in corrosive environment.
- With good electromagnetic compatibility, the pump will not behave unacceptably in the EMI environment and will not interfere with other electronic equipment.
- With high IP rating, the pump could be used in wet and dusty environment.
- Using high quality electronic components, optimizing software design and circuit design, the pump provides long-term reliable and stable operation.
- With precise speed control in 0.1rpm resolution (3000:1 turndown ratio), and flow rate calibration function, the pump has more accurate flow rate.

Pump Head Options

Speed	0rpm-300rpm, CW/CCW
Speed Resolution	0.1rpm resolution within the speed of 0-100rpm 1rpm resolution within the speed of 100rpm-300rpm
Display	LCD
Control Mode	Keypad control, external signal control
Work Mode	Flow rate mode or dispensing mode
Flow rate mode	Flow rate is displayed and the pump runs continuously at the set flow rate
Flow rate calibration	Improve the flow rate accuracy
Flow rate setting range	1.000mL/min-9999mL/min
Dispensing mode	The pump dispenses continuously according to the parameters: dispensing volume, cycles, interval, back suction
Dispensing calibration	Improve the dispensing volume accuracy
Dispensing Volume	0.1mL-9999L
Dispensing cycle	0-9999
Interval time	1sec-99.9min
Back suction angle	0-1800°, resolution is 36°
External control	Start/stop control, direction control: voltage level signal, 5V to 12V. Speed control: 0-5V.
Pump status output	1 OC gate signal for start/stop, 1 OC gate signal for direction. 0-4000Hz pulse signal for pump speed 0rpm-300rpm(linear function).
Power-off memory	Return to previous status when power on
Footswitch control	The pump could be start/stop controlled by footswitch accessory
Dimension(L×W×H)	360mm×215mm×243mm
Power Supply	AC220V±10%/120W, 50/60Hz
Operating Temperature	0 to 40°C
Relative humidity	<100%
IP rating	IP65
Weight	14kg

Model	Product code	Pump Head	Tubing	Max. Flow Rate (mL/min)	Weight(kg)
G300-3F	05.02.2CL	YZ35-13-B	73" 82"	5500	15.65

dPOFLEX® Peristaltic Pump
GP01,BP01

- Available in stainless steel housing and cast aluminum housing for variety of applications
- IP66 for wet and dusty environment
- Supporting fieldbus communication control, digital signal control, analog signal control, and pump status output
- Three-level user authority management, with electronic signature and audit trail functions, meet 21CFR Part 11 and GMP requirements
- Integrating multiple sensors: fluid leakage sensor, open-head sensor and flow rate sensor, to realize predictive maintenance

Pump drive model	dPOFLEX GP01	dPOFLEX BP01
Housing material	Cast aluminum	304sst
Speed range	0.1rpm-265rpm, CW/CCW	
Speed resolution	0.1rpm	
Display	4.3 inch LCD, Chinese or English	
Clock function	Year/month/day/hour/minute can be set, hours and minutes are displayed on the running screen	
Work mode	Flow rate mode, dispensing mode, calibration mode	
Flow rate mode	Pump runs continuously at the set flow rate, and displays flow rate and pump speed on the screen	
Flow rate setting range	1.1ml/min-17.0L/min (depending on pump head and tubing)	
Dispensing mode	Pump repeats the dispensing at set volume, cycles and interval time, and displays single volume, dispensed volume, dispensed cycles/target cycles on screen	
Volume of single dispense	1.0mL-274.9L (depending on pump head and tubing)	
Dispensing cycles	1-9999 (0 for unlimited)	
Interval time	5s-9999s	
Calibration function	Improve the flow rate and dispensing volume accuracy	
Control mode	Keypad control, external signal control and communication control	
Communication control	Standard: RS485 and Industrial Ethernet Interface, Modbus RTU and TCP/IP protocol Optional: Profibus DP	
External control	Speed control: 0-10V, 4-20mA start/stop, direction control: 5V-24V logic level signal or relay signal (dry contact)	
Status output	Pump Speed: 0-10V, 4-20mA, frequency signal Running/stop, direction, tubing leak alarm/other alarm: 3 relay signal (dry contact)	
Open head sensor	Pump will stop when pump head is open for enhanced user safety	
Status when power up	Stop	
Keypad lock function	Enable the keypad lock function to lock the keypad automatically after 20s standby, (start/stop key will not be locked)	
Tubing leak detection	Detect the tubing leak and give alarm (optional)	
Flow rate measurement	Measure the flow rate by connecting flow meter (optional)	
User access control	Three levels of user accesses (administrator, technician, operator)	
Electronic signature and audit trail	Meet the requirement of FDA 21CFR Part 11	
Log record	Record 90 days operation history, and can be exported directly	
3Q verification	IQ/OQ	
Certificate	CE, UKCAEN 61010-1:2010, EN IEC 61010-2-201; EMC: EN IEC61000-6-2, EN IEC 61000-6-4	
Dimension (LxWxH)	260x407x298mm	260x407x290mm
Power supply	AC100-240V 50/60Hz, 250W	
Operating condition	Temperature: 5°C-40°C, relative humidity ≤100%	
IP rating	IP66	
Weight (drive only)	≤17.6kg	≤16.6kg

Model (Product Code)	Pump Head	Roller Number	Tubing	Reference Max. Flow Rate (L/min)
dPOFLEX GP01 (05.02.80A) dPOFLEX BP01 (05.02.81A)	GPH01	2	26#, 73#, 82#, 184#	15

dPOFLEX® Explosion Proof Motor Pump
EP01

- Explosion proof motor
- Using frequency converter outside the hazardous location
- IP55 protection
- Explosion proof design pump heads with high flow rate up to 17L/min

Pump Drive	Pump speed	23rpm-265rpm
	Housing material	Cast iron (304ss protective cover is optional)
	Control mode	Frequency converter (to be used outside the hazardous location)
	Protection type	Ex d IIB T4 Gb
	Dimension (L*W*H)	765x300x400mm (without pump head)
	Power supply	3-phase AC 380V, 5Hz-60Hz
	Rated power	0.75kW
	Frequency range	5Hz-60Hz
Frequency Converter (Optional)	Working condition	5-40°C, relative humidity ≤90% RH
	IP rating	IP55
	Weight	60kg (without pump head and 304ss cover)
	1-phase converter	Model: VFD4A8MS21ANSAA, Input: 1-phase AC220V
	3-phase converter	Model: VFD2A7MS43ANSAA, Input: 3-phase AC380V
	Running direction	CW or CCW
	Speed resolution	0.01Hz (based on the output frequency resolution of the converter)
	Control mode	Keypad control, remote control and communication control
Communication control	Display	Segment LED display
	External control	Output frequency could be controlled by analog signal: 0-10V, 0-20mA, 4-20mA; Manual/remote control mode, pump running direction, pump start/stop, could be controlled by digital signal
	Status output	Output 0-20mA or 4-20mA to indicate the frequency to pump; Output relay signal to indicate pump status such as running/stop, direction or alarm
	Communication control	Rs485 interface, Modbus RTU protocol

Pump Model (Product Code)	Pump Head	Roller Number	Tubing	Reference Max Flow Rate (L/min)

Laboratorial Syringe Pump

dLSP 500 Series

- Dedicated PC software and Android App permit remote control and monitoring
- Intelligent diagnosis and voice reminder for working progress and pump status
- High precision and stable fluid delivery with good EMC performance, ideal for microfluidic and electrospinning application
- 7 inch full touch screen with intuitive graphic interface for fantastic interactive experience
- Custom parameters can be configured quickly, and be stored and easily recalled
- User access control and log record for safety management. With the electronic signature function for FDA (21CFR Part 11) compliance

	dLSP 510	dLSP 520	dLSP 540*	dLSP 5A0*	dLSP 510 Pro	dLSP 520 Pro
Work mode	Infusion only, withdrawal only, infusion/withdrawal, withdrawal/ infusion, auto repeated, programming (on dedicated PC software)					
Number of channel	1	2	4	10	1	2
Pusher advance per microstep	0.03255μm/μstep				0.015625μm/μstep	
Linear speed	0.0833μm/min-180mm/min				0.04μm/min-86.4mm/min	
Step speed	23.4375 sec/μstep-10.85 μsec/μstep

Laboratorial Syringe Pump

L0107 Series

Mainly used in laboratorial applications. Controller and drive unit are separated. The drive unit has syringe holder and clamp.

Specifications	Model	TJ-1A/L0107-1A	TS-1A/L0107-1A, TS-1A-B/L0107-1A	TJ-2A/L0107-2A	TS-2A/L0107-2A, TS-2A-B/L0107-2A
Work mode		Infusion		Infusion, withdrawal, infusion/withdrawal, withdrawal/infusion, continuous	
Drive unit		1	1 to 4	1	1 to 4
Stroke of drive unit		70mm			
Pusher advance per microstep		0.165μm			
Linear speed		7.94μm/min-79.4mm/min (Flow rate=Linear speed * Section area of the barrel)			
Linear speed resolution		7.94μm/min			
Linear travel accuracy		≤±0.5% when travel ≥30% of drive unit stroke			
Linear force(max.)		>20N			
Syringe selection		Built-in syringe branches, sizes and IDs for selection			
Syringe user-defined		Can store four user-defined syringe IDs			
Flow rate calibration		Improve flow rate accuracy			
Running parameters setting		Parameters, such as dispensing volume, can be set by each channel. Or all channels use the parameters of the specified channel			
Start setting		Each drive unit can be started separately, simultaneously or according to each delay time			
Display setting		Display volume, flow rate or linear speed			
Power-off memory		Select keeping previous status or resetting parameters when powered on			
Fast forward/backward		Infuse or withdraw liquid at full speed			
Status signal output		2 output signals (OC gate signal) to indicate start/stop and direction			
Control signal input		3 input signals (TTL signal) to control start/stop, fast forward and fast backward			
Communication interface		RS485

		2	9.00	0.505μL/min-5.05mL/min
		5	13.10	1.07μL/min-10.7mL/min
		10	16.60	1.718μL/min-17.18mL/min
		20	19.00	2.251μL/min-22.51mL/min
		30	23.00	3.298μL/min-32.98mL/min
		60	29.14	5.295μL/min-52.95mL/min

Mainly used in laboratorial applications. Controller and drive unit are separated. With the programmable function, you can customize complex infusion/withdrawal process, such as stepped infusion, combination constant speed and ramped speed infusion, trigger dispense or periodic dispense.

TJP-3A/W0109-1B
Programmable Functions

1. Multi-step uniform speed (profile) infusion
2. Complicated curve of Uniform Speed & Uneven Speed

3. Trigger Dispense
4. Periodic Dispense

Laboratorial Syringe Pump

TJ-4A/SL0104-1A, TJ-4A/SL0107-1A

TJ-4A/SL0104-1A

Mainly used in veterinary medicine applications for intracellular injections or biological chemical dosing with small volume in picoliters. Drive unit has small size and lightweight, can be mounted on stereotaxic apparatus and micromanipulator.

Specifications	Model	TJ-4A/SL0104-1A	TJ-4A/SL0107-1A
Work mode		Infusion, withdrawal, infusion/withdrawal, withdrawal/infusion, continuous	
Drive unit		1	
Stroke of drive unit		40mm	70mm
Pusher advance per step		3.048μm	
Linear speed		3.048μm/min-128.016mm/min(Flow rate=linear speed * section area of the barrel)	
Linear speed resolution		3.048μm/min	
Linear travel accuracy		≤±0.5%(when travel≥30% drive unit stroke)	
Linear force (max.)		>10N	
Syringe selection		Built-in syringe branches, sizes and IDs for selection	
Syringe user-defined		Can store four user-defined syringe IDs	
Flow rate calibration		Improve flow rate accuracy	
Running parameters setting		Parameters, such as dispensing volume, dispensing time, can be set through controller	
Display setting		Display volume, flow rate or linear speed	
Power-off memory		Select keeping previous status or resetting parameters when powered on	
Fast forward/ backward		Infuse or withdraw liquid at full speed	
Status signal output		2 output signals (OC gate signal) to indicate start/stop and direction	
Control signal input		3 input signals (TTL signal) to control start/stop, fast forward and fast backward	
Communication interface		RS485	
Controller dimensions (L×W×H)		170×108×65(mm)	
Controller weight		0.5kg	
Drive unit dimensions (L×W×H)		130×35×34(mm)	160×35×34(mm)
Drive unit weight		258g	289g
Power supply		AC 90V-260V/10W	
Operating temperature		0 to 40°C	
Relative humidity		<80%

Laboratorial Syringe Pump

LSP Series

- Mainly used in biological laboratories and other places
- It is applicable to various specifications of syringes and can meet the needs of customers

LSP01-2A

LSP02-2A

LSP04-1A

LSP10-1B

Model	LSP01-2A	LSP02-2A	LSP04-1A	LSP10-1B
Specifications				
Work mode	Infusion			Infusion, withdrawal, infusion/withdrawal withdrawal/infusion, continuous
Channel	1	2	4	10
Stroke of pump	140mm			
Pusher advance per microstep	0.03125μm		0.156μm	
Linear speed	1μm/min-13mm/min		5μm/min-130mm/min(Flow rate=Linear speed * Section area of the barrel)	
Linear speed resolution	1μm/min		5μm/min	
Linear travel accuracy	≤±0.5% when travel ≥30% of pump stroke			
Linear force(max.)	>90N	>290N	>180N	
Syringe selection	Built-in syringe branches, sizes and IDs for selection			
Syringe user-defined	Can store four user-defined syringe IDs			
Flow rate calibration	Improve flow rate accuracy			
Running parameters setting	Infusion volume, infusion time, etc			Infusion/Withdrawal volume, infusion time, withdrawal time, pause time, etc
Display setting	Display volume, flow rate or linear speed			
Power-off memory	Storing the running parameters automatically			
Status signal output	2 output signals (OC gate signal) to indicate start/stop and direction			
Control signal input	Falling edge or TTL signal to control Start/stop			
Communication interface	RS485			
Dimensions (L×W×H)	280×210×140(mm)		280×250×140(mm)	280×330×140(mm)
Weight	3.6kg		4.5kg	5.3kg
Power supply	AC 90V-260V/15W		AC 90V-260V/20W	
Operating temperature	0 to 40℃			
Relative humidity	<80%

Laboratorial Syringe Pump

LSP01-3A, LSP02-2B

Mainly used in Lab applications.
Excellent EMC performance, ESD≥Level IV (IEC 61000-4-2)

Specifications	Model	LSP01-3A	LSP02-2B
Work mode		Infusion	Infusion, withdrawal, infusion/withdrawal, withdrawal/infusion, continuous
Channel		1	2
Stroke of pump		140mm	
Pusher advance per microstep		0.156μm	
Linear speed		5μm/min-65mm/min	5μm/min-130mm/min(Flow rate=Linear speed * Section area of the barrel)
Linear speed resolution		5μm/min	
Linear travel accuracy		≤±0.5% when travel≥30% of pump stroke	
Linear force(max.)		>90N	>180N
Syringe selection		Built-in syringe branches, sizes and IDs for selection	
Syringe user-defined		Can store four user-defined syringe IDs	
Flow rate calibration		Improve flow rate accuracy	
Running parameters setting		Infusion volume, infusion time, etc	Infusion/Withdrawal volume, infusion time, withdrawal time, pause time, etc
Display setting		Display volume, flow rate or linear speed	
Power-off memory		Storing the running parameters automatically	
Status signal output		2 output signals (OC gate signal) to indicate start/stop and direction	
Control signal input		Falling edge or TTL signal to control Start/stop	
Communication interface		RS485	
Dimensions (L×W×H)		280×210×140 (mm)	280×250×140 (mm)
Weight		3.6kg	4.3kg
Power supply		AC 196V-240V/20W	AC 196V-240V/40W
Operating temperature		0 to 40°C	
Relative humidity		<80%

Laboratorial Syringe Pump

LSP01-1C

Mainly used in laboratorial applications.
High accuracy, suitable for continuous transferring of low-flow liquid.

LSP01-1C Tubing Connection Illustration

Work mode	Infusion and withdrawal synchronous and continuous
Channel	1
Stroke of pump	140mm
Pusher advance per microstep	0.156um
Linear speed	5um/min-65mm/min
Linear speed resolution	5um/min
Linear travel accuracy	≤±0.5% when travel ≥30% of pump stroke
Linear force(max.)	>90N
Syringe selection	Built-in syringe branches, sizes and IDS for selection
Syringe user-defined	Can store four user-defined syringe IDS
Flow rate calibration	Improve flow rate accuracy
Running parameters setting	Dispensing volume, infusion time, etc.
Display setting	Display volume, flow rate or linear speed
Power-off memory	Storing the running parameters automatically
Status signal output	1 OC gate signal to indicate start/stop
Control signal input	Falling edge or TTL signal to control start/stop
Communication	RS485
Dimensions (L×W×H)	280×210×140(mm)
Weight	3.6kg
Power supply	AC 90V-260V/15W
Operating temperature	0 to 40°C
Relative humidity	<80%

Model	Product Code	Syringe	Syringe ID(mm)	Flow Rate(μL/min-mL/min)
LSP01-1C	05.03.42A	10uL	0.50	0.001μL/min-0.0128mL/min
		25uL	0.80	0.0025μL/min-0.0327mL/min

Laboratorial High-pressure Syringe Pump

LSP01-1BH

Mainly used in laboratorial applications. Suitable for viscous and high pressure liquid transferring.

Work mode	Infusion, withdrawal, infusion/withdrawal, withdrawal/infusion, continuous
Channel	1
Stroke of pump	140mm
Pusher advance per microstep	0.156μm
Linear speed	5μm/min-130mm/min
Linear speed resolution	5μm/min
Linear travel accuracy	≤±0.5% when travel ≥30% of pump stroke
Linear force(max.)	>450N
Syringe selection	Built-in syringe branches, sizes and IDs for selection
Syringe user-defined	Can store four user-defined syringe IDs
Flow rate calibration	Improve flow rate accuracy
Running parameters setting	Infusion volume, infusion time, withdrawal time, pause time, etc
Display setting	Display volume, flow rate or linear speed
Power-off memory	Storing the running parameters automatically
Status signal output	2 output signals (OC gate signal) to indicate start/stop and direction
Control signal input	Falling edge or TTL signal to control Start/stop
Communication interface	RS485
Dimensions (L×W×H)	280×250×140 (mm)
Weight	6.3kg
Power supply	AC 90V-260V/25W
Operating temperature	0 to 40℃
Relative humidity	<80%

Model	Product Code	Syringe(mL)	Syringe ID(mm)	Flow Rate (μL/min-mL/min)	Outlet Pressure (Mpa)
LSP01-1BH	05.03.43A	2.5	4.79	0.0901μL/min-2.3426mL/min	19.48
		8	9	0.3181μL/min-8.2702mL/min	7.07

		100	34.9	4.7831μL/min-124.361mL/min	0.37

Industrial Syringe Pump

SP1-CX, MSP1-CX

- Mainly used in OEM equipment and instruments, especially for lab automation systems and IVD application.
- Rotating valve, and misc. accessories available.
- RS485, RS232 or CAN bus communication interface.

	SP1-CX	MSP1-CX
Main Spec		
Accuracy	≤1.0 % (syringe ≥1 mL)	
Precision	CV≤0.05% at full stroke (with syringe ≥ 500uL)	CV≤0.05% at full stroke (with syringe ≥1mL)
Wetted material	Borosilicate glass, PTFE, PFA, CTFE, ETFE, UHMW-PE, Ceramic	
Dimension(L×W×H)	114mm x 65mm x 254mm	110mm x 44.4mm x127mm
Weight	2.15 kg	1.0 kg
Power supply	DC 24V, 1.5A (peak)	
Syringe and Drive		
Syringe fitting	1/4"-28 thread	
Syringe	50uL, 100uL, 250uL, 500uL, 1mL, 2.5mL, 5mL, 10mL, 25mL	50uL, 100uL, 250uL, 500uL, 1mL, 2.5mL, 5mL
Syringe material	Borosilicate glass, stainless steel plunger with PTFE coating, PTFE or UHMW-PE plunger tip	
Resolution (standard mode)	6000 steps with 0.01mm in 1 step	3000 steps with 0.01mm in 1 step
Resolution (microstep mode)	48000 microsteps with 1.25um in 1 microstep	48000 microsteps with 0.625um in 1 microstep
Travel	60mm	30mm
Time for full stroke	1.26s-1200s	
Drive system	Ball screw drive with optical encoder	
Valve & Valve Drive		
Turn Time	≤250ms between adjacent ports	
Valve options	3-port Y valve, 3-port distribution valve, 4-port valve, 6-port distribution valve, 9-port distribution valve, T valve, straight-through valve or distribution valve.	
Max pressure	0.68MPa	
Fitting	1/4"-28 thread	
Communication		
Interface	RS485, RS232, CAN bus, external control input and output	
Protocol	Data terminal, OEM protocol (serial) or CAN	
Baud rate	RS485 or RS232: 9600bps or 38400bps CAN bus: 100 KB, 125 KB 250 KB, 500 KB or 1MB	
Format	Data bit: 8; parity: none; stop bit: 1; half duplex (RS232/485)	
Firmware		
Topology group	Up to 15 pumps in one group, support group control and individually addressed	
Upgrade firmware online	"One Click" by customer through PC Utility	
Homing Algorithm	Plunger home position is identified by motor stall, which will reduce the dead volume of the system	
Halt function	For better interactive control, "h" command is used to halt execution of the command string during plunger movement. To resume execution with "R" or "r" command	
Microstep mode	Set microstep mode for smoother motion with 48000 microsteps per stroke, 1/8 microstepping or 1/16 microstepping	
Programmable parameter	Programmable ramps, cut-off velocity, plunger speeds, backlash compensation, programmable work-flow command set , delays and loops, terminate moves, diagnostics, absolute and relative positions	
Environmental		
Operating temperature	Recommended: 15°C-40°C , use low temperature syringe for low temperature application	
Operating Humidity	<80% RH, no condensation	
Storage temperature	-20°C-65°C	
Storage Humidity	<80% RH, no condensation	

Industrial Syringe Pump

MSP1-D1, MSP1-E1

Mainly used in OEM equipment and instruments, especially for automation systems.
Rotating valve, panel installation, RS485 or RS232 communication control.

Specifications	Model	MSP1-D1	MSP1-E1
Accuracy		≤1%(rated stroke)	
Precision		Repeatability≤0.5%(rated stroke)	
Rated stroke (steps)		30mm(1000 steps)	
Linear speed		0.5mm/s-15mm/s	
Time for rated stroke		2s-60s	
Control resolution		0.03mm(1 step)	
Transmission mechanism		Rack and pinion drive	
Plunger drive force (max.)		≥68N	
Secondary plunger drive force (max.)		≥34N	-
Syringe		500μL, 1mL, 2.5mL, 5mL	
Valve		3 port 120°	3-way solenoid valve
Valve plug turn time		≤280ms between adjacent ports	≤100ms
Wetted material		Borosilicate glass, PTFE, PCTFE	Borosilicate glass, PTFE, PEEK
Max. pressure		0.68Mpa	0.1Mpa
Tubing fitting		1/4"-28 thread	
Syringe fitting		1/4"-28 thread	
Signal input		1 input signals (TTL signal, drive current > 16mA)	
Signal output		1 output signals (OC gate signal) to indicate the working status	
Communication interface		RS485 or RS232	
Bit rate		9600bps or 38400bps	
Pump ID setting		Set the pump ID through BCD dial switch (0 to E corresponding to pump address 1-15)	
Pump parameters setting		Set the parameters through DIP switch	
Dimension (L×W×H)		100×65×127(mm)	
Power supply		DC 24V/1.5A	
Operating temperature		15 to 40°C	
Relative humidity		<80%	
Weight		0.9kg	

Industrial Multi-Channel Syringe Pump

SP4-D1, SP4-E1

Mainly used in OEM equipment and instruments, especially for automation systems.
Four channels synchronously running, high strength housing, panel or soleplate installation, RS485 or RS232 communication control.

Specifications	Model	SP4-D1	SP4-E1
Accuracy		≤1% (rated stroke)	
Precision		Repeatability≤0.5% (rated stroke)	
Rated stroke (steps)		60mm (1000 steps)	
Linear speed		0.03mm/s-24mm/s	
Time for rated stroke		2.5s-2000s	
Control resolution		0.06mm (1 step)	
Transmission mechanism		Synchronous belt mechanism	
Plunger drive force (max.)		≥68N for four channels	
Syringe		50μL, 100μL, 250μL, 500μL, 1mL, 2.5mL, 5mL	
Valve		No	3-way solenoid valve
Valve plug turn time		-	≤100ms
Wetted material		Borosilicate glass, PTFE, PPS	Borosilicate glass, PTFE, PEEK
Max. pressure		0.68 MPa (valve)	0.1MPa
Tubing fitting		1/4" -28 thread	
Syringe fitting		1/4" -28 thread	
Signal input		2 input signals (TTL signal, drive current >16mA) to restart the pump after pause	
Signal output		3 output signals (OC gate signal) to indicate the working status	
External Solenoid valve control		Can control 4 pcs of independent 24VDC solenoid valve. The rated drive signal for each valve is DC24V/200mA	With built-in solenoid valve
Communication interface		RS485 or RS232	
Bit rate		9600bps or 38400bps	
Pump ID setting		Set the pump ID through BCD dial switch	
Pump parameters setting		Set the parameters through DIP switch	
Dimension (L×W×H)		140×167×261.5 (mm)	
Power supply		DC 24V/1.5A	
Operating temperature		15 to 40°C	
Relative humidity		<80%	
Weight		2.4kg	

Micro Gear Pump

WT3000 Series

Mainly used in laboratorial applications.
Brushless motor, stainless steel pump head.

Pump Specification

Specifications	Model	WT3000-1FA	WT3000-1FB-A, WT3000-1FB-B	WT3000-1JA	WT3000-1JB-A, WT3000-1JB-B
Speed		300rpm-3000rpm			
Speed resolution		1rpm			
Dispensing volume		0.1mL-999L			
Copy number		0-9999, "0" means unlimited cycle			
Pause time		1s-999hr, resolution is 0.1s			
Calibration time		30s-1800s, resolution is 1s			
Diameter of particle in liquid		≤10μm			
Viscosity		≤200cSt			
Speed signal input		4-20mA, 0.5-5V, 1-10V, 1-10kHz corresponding to 300rpm-3000rpm			
Start/Stop signal input		TTL signal			
Speed output		1.25kHz-12.5kHz corresponding to 300rpm-3000rpm			
Start/Stop output		OC gate signal

Micro Piston Pump

MP Series

High Precision, Long Life.
It can meet the strict requirement of In Vitro Diagnostic medical devices and analytical instruments for micro fluid transfer.

Pump Specification

Precision	Dispensing 100% of total volume	CV<0.1%(Pump Volume<500μL) CV<0.05%(Pump Volume ≥ 500μL)
	Dispensing 10% of total volume	CV<0.5%(Pump Volume<500μL) CV<0.1%(Pump Volume ≥ 500μL)
	Dispensing 1% of total volume	CV<2%(Pump Volume<500μL) CV<1%(Pump Volume ≥ 500μL)
Accuracy	≥99.5% at full dispensing	
Expected life	10 Million Cycles with Distilled Water 5 Million Cycles with Crystallizable solution	
System pressure	≤0.68Mpa(Depending on model)	
Full stroke	12.7mm	
Resolution	2000 steps: 0.00635mm/step	
	4000 steps: 0.003175mm/step	
Pump speed	Pump volume≤1mL: the min. time for full stroke is 0.8s	
	Pump volume of 2.5ml: the min. time for full stroke is 1s	
	Pump volume of 5ml: the min. time for full stroke is 1.2s	
Home positon detection	Optical switch is used to detect the home position of the piston to initiate accurate step counts	
Dimension(L×W×H)	61×45×132(mm)	
Relative humidity	20%-80%	
Temperature	5 to 40℃	
Weight	0.51kg	

Pump Volume	Resolution(μL/step)	
	20TPI lead screw for 2000 steps	40TPI lead screw for 4000 steps
25μL	0.0125	0.00625
50μL	0.025	0.0125

5000μL	2.5	1.25

Micro Piston Pump Model Configuration

Hemodialysis Pump

MTH18-12

Mainly used in hemodialysis applications. DC brushless motor, more stable, low noise. Small size, compact structure, ideal for OEM equipment and instruments. Brushless motor drive board (model:BLDCDRV-B1) is available. Or work with customer's specific drive board.

The lever of the rotor assembly helps to load the tubing easily and run the pump head manually.

The tubing and pump running condition can be easily monitored through the transparent PC cover. Cover open to stop to protect the operator and monitor pump status.

Dispensing & Filling System - Peristaltic Pump

FU4B-1&FC32S-1, FU5B-1&FC32S-1

- Mainly designed for automatic filling & dispensing machine.
- 304ss housing has good corrosion resistance.
- Controller FC32S-1 and dispensing system FU4B-1/FU5B-1 are separated, to allow flexible mounting way.
- One dispensing unit of FU4B-1 has four channels, one dispensing unit of FU5B-1 has five channels. With modular structure, one controller can control 32 channels.
- Controller adopts 7 inch industrial touchscreen interface to operate easily and friendly.
- Each channel has independent membrane key and LED display, which can be used to set the channel address and calibrate the dispensing volume when system is running or stop.

Dispensing volume	0.1ml-9999.99ml (resolution: 0.01ml)
Dispensing time	0.5s-6000s (resolution: 0.1s)
Interval time	0.5s-999.9s
Dispensing cycle	0-999999, "0" means unlimited cycle
Delay time before back suction	0-60.0s
Back suction angle	0-1000°
Channel quantity	One FU4B-1 has 4 channels, one FU5B-1 has 5 channels. The system channels can be expended by modular structure. One controller can control 32 channels
Display	LCD
Control mode	Touchscreen control,external signal control or communication control
Start control signal input	Each dispensing unit has one pair of terminals for the external start signal
No bottle signal input	Each channel has individual terminals for the no bottle signal
Communication function	Rs485 communication interface, Modbus protocol, communication parameters (address, baud rate, parity, stop bit) can be set through touchscreen
Dispensing calibration	Dispensing volume of every channel can be calibrated through percentage, volume, weight or average weight method.
Channel enable	Every channel can be set as enable or disable
Fill/Backflow	All channels can be fast filling or backflowing at high speed simultaneously or separately
Channel address	Communication address of each channel can be set through independent membrane key and displayed on independent LED
Password function	Protect the system parameters and prevent misoperation through the password function
Dispensing parameter set	Dispensing parameters can be saved as a parameter set which can be invoked easily without reset it.
Dispensing unit dimension(L×W×H)	FU4B-1 (4 channels): 663mm × 218mm × 177mm FU5B-1 (5 channels): 823mm × 218mm × 177mm
Controller dimension(L×W×H)	228mm × 60mm × 146mm
Power supply	FU4B-1/FU5B-1: AC220V±20%/300W, FC32S-1: AC90V-260V/10W
Operating temperature	0 to 40°C
Relative humidity	<80%
IP rating	IP31
Weight	FU4B-1: 12kg, FU5B-1: 15kg, controller: 1.7kg

Dispensing & Filling System - Peristaltic Pump

FK1-100Z

FK1-100Z is mainly designed for automatic filling & dispensing machines. Each unit has four channels and one controller. With modular structure, the channel number can be extended by mechanically connecting units.

Dispensing volume	0.5mL-100mL
Dispensing time	0.5 to 30s
Speed	1rpm-600 rpm
Back suction time	0 to 1s
Dispensing calibration	Calibrate dispensing volume to improve accuracy
Start/stop control signal input	1 switch signal
No bottle signal input	4 switch signals corresponding to 4 channels
Power-off memory	Storing the running parameter automatically
Communication interface	RS485
Dimension (L×W×H)	800×200×174 (mm)
Power supply	AC 220±10%/300W
Operating temperature	0 to 40℃
Relative humidity	<80%
IP rating	IP31
Weight	18.7kg

dPOFLEX® High Precision Filling System

PFU, PFS

- Precise filling of micro-volume as low as 30uL, accuracy better than ±1%
- Can be used independently as a small benchtop filling system, or integrated into semi-automatic systems or fully automated systems
- The master controller can control up to 32 channels, which can be set with individual parameters
- Three levels of user accesses, operation log, batch report with electronic signature, for FDA 21CFR Part 11

	PFU (Single Channel)	PFS (Four Channels)
Pump head	PFH01(microliter pump head) , PFH02 (milliliter pump head)	
Tubing	Silicone tubing and tubing kits	
Filling volume	1uL- 99.99L	
Filling accuracy	better than ±1%	
Filling precision	CV< 0.5%	
Filling time	0.1seconds-999.9hours	
Filling cycle	0-999999 (0 means unlimited)	
Interval time	0.1s - 999.9s	
Back suction parameter	0-30	
Working direction	Clockwise	
Calibration	Manual input calibration, balance reading calibration or online ratio calibration, with volume or mass data	
Display	7 inch touch screen, Chinese or English can be set	
Work mode	Single channel filling, multi-channel filling with the same parameters or individual parameters	
Access management and password protection	Three levels of user accesses (administrator, developer, operator), each user can have an exclusive password	
Parameter recipe	Up to 500 recipes can be stored and recalled easily on the PFC controller	
Batch report	Up to 800 batch reports can be stored on the PFC controller, which can be saved to USB flash drive or printed directly	
Communication control	Rs485 interface, Modbus RTU protocol	Rs485 interface, Modbus RTU protocol; or Ethernet interface, TCP/IP protocol as optional
External control input	Start the pump, emergency stop, disable channel	
Output	1 output for malfunction status	
IP rating	IP31	IP32
Power supply	AC 100V-240V , 50/60Hz , 60W	AC 100V-240V , 50/60Hz , 250W
Dimension (L*W*H)	119mm×203mm×176mm (without pump head)	548mm×245mm×198mm (without pump head)
Weight of system	3.5kg (without pump head)	16.1kg (without pump head)
Dimension of controller (L*W*H)	187mm×123mm×39mm	
Weight of controller	0.6kg	
Working condition	Temperature: 5 - 40℃ , RH: ≤85%, no condensation	
Storage and transportation condition	Temperature: -40 - 70℃ , RH: ≤85%, no condensation	

Syringe Pump Filling System

HMD04-1

Mainly used in filling & dispensing machine. With high accuracy, suitable for small volume dispensing.

Each unit has four channels. With modular structure, one controller can control up to four units.

Product Code: 05.11.10A

Accuracy	≤1% (dispensing volume is the 100% of syringe capacity)
Precision	Repeatability ≤0.5% (dispensing volume is the 100% of syringe capacity) Repeatability ≤2% (dispensing volume is more than 20% of syringe capacity)
Dispensing volume	100μL-5mL (dispensing volume is the 20%-100% of syringe capacity)
Speed	8.3μL/s to 2.5mL/s
Dispensing & filling time	Automatically calculate the time based on volume and speed
Pause time of dispensing	0 to 3600s
Copy number	1 to 30000, "0" means unlimited cycle
Calibration	Each channel dispensing volume is calibrated separately
Number of pretreatment, back flow, rinse	1 to 100
Syringe	500μL, 1mL, 2.5mL, 5mL, full stroke is 30mm
Wetted material	Borosilicate glass, PTFE, PCTFE
Max. pressure	0.68Mpa
Tubing fitting	1/4"-28 thread
Syringe fitting	1/4"-28 thread
Control mode	Control panel or external control
Dispensing start signal input	TTL signal, high level to trigger (all channels are controlled synchronously)
Rinse signal input	TTL signal, high level to trigger (all channels are controlled synchronously)
No bottle signal input	TTL signal, low level to trigger (each channel is controlled separately)
Dimensions (L×W×H)	600mm×256mm×170mm (Controller and drive unit)
Power supply	AC 90V-260V/60W
Operating temperature	15 to 40°C
Relative humidity	<80%
IP rating	IP31, Stainless steel housing
Weight	10kg (Controller + one unit)

OEM Peristaltic Pump Head

KZ10-24, KZ15-14

Compact structure, suitable for OEM peristaltic pump.

Two to four heads can be stacked for multi-channel applications.

Installation Drawing

OEM Peristaltic Pump Without Drive

T-S403

Step Motor.
Special pump head mounting bracket
can be fitted with single KZ15-14 or
KZ10-24 pump head.
Ideal OEM peristaltic pump for
equipments and instruments.
Panel installation as standard.
Soleplate installation can be
customized.
Meet RoHS requirement.

OEM Variable Speed Peristaltic Pump

T100&WX10-14 Series

Use WX10-14 pump head.
Mainly designed for OEM applications.
Multi-control modes are available.
Soleplate installation is standard, panel installation is optional.

Installation Drawing

Pump Specification

Items	Specification
Speed	≤100rpm
Speed resolution	0.1rpm
Max. flow rate	40mL/min
Tubing	ID≤3.17mm wall thickness 0.8mm-1.0mm
*Direction control	Direction is controlled by external switch signal.CW when switch is open, CCW when switch is closed
*Start/stop control	Start/stop is controlled by external switch signal. Pump runs when switch is open, stops when switch is closed
*BCD dial switch speed control	The speed is divided into 15 grades. BCD position 1-F corresponding to (rpm)5,10,15,20,25,30,35,40,45,50,60, 70,80,90,100 (rpm)
*External speed control (optional)	4-20mA corresponding to 0.1-100rpm, 0-5V corresponding to 0-100rpm, 0-10V corresponding to 0-100rpm, 0-10kHz corresponding to 0-100rpm
**Communication pump ID	Pump ID range is 1-30
**Bit rat	1200bps or 9600bps
Dimension (L×W×H)	106 x 60 x 81 (mm)
Relative humidity	<80%
Operating temperature	0 to 40°C
Power supply	DC11.4V-25.2V
Power consumption	≤12W
Weight	0.51kg

Note: Items with * are only available for products with dial switch and external speed control signal.
Items with ** are only available for product with RS485.

Pump Selection Table

Model	Product Code	Control Mode	Certificate
T100-S300&WX10-14-H	056001H	Dial switch and external signal (4-20mA)	CE certified and Meet RoHS requirement

OEM Variable Speed Peristaltic Pump

T100-S320

Multi-control Modes.
Special pump head mounting bracket
can be fitted with single KZ15-14 or
KZ10-24 pump head.
Ideal OEM peristaltic pump for
equipment and instruments.
Soleplate or panel installation.

Installation Drawing

Pump Specification

Items	Specification
Speed	≤100rpm
Speed resolution	0.1rpm
*Direction control	Direction is controlled by external switch signal. CW when switch is open, CCW when switch is closed
*Start/stop control	Start/stop is controlled by external switch signal. Pump runs when switch is open, stops when switch is closed
*BCD dial switch speed control	The speed is divided into 15 grades. BCD position 1-F corresponding to 5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 60, 70, 80, 90, 100 (rpm)
*External speed control(optional)	4-20mA corresponding to 0.1-100rpm, 0-5V corresponding to 0-100rpm, 0-10V corresponding to 0-100rpm, 0-10kHz corresponding to 0-100rpm
**Communication pump ID	Pump ID range is 1-30.
**Bit rate	1200bps or 9600 bps
Dimension(L×W×H)	90×60×80(mm)
Relative humidity	<80%
Operating temperature	0 to 40°C
Power supply	DC11.4V-25.2V/12W

Note: Items with * are only available for products with dial switch and external speed control signal.

Pump Selection Table

Model	Product Code	Control Mode	Certificate
T100-S320	05.60.130	Dial switch and external signal (4-20mA)	Meet RoHS requirement
T100-S321	05.60.131	Dial switch and external signal (0-5V)	
T100-S322	05.60.132	Dial switch and external signal (0-10V)	
T100-S323	05.60.133	Dial switch and external signal (0-10kHz)	
T100-S502	05.60.202	RS485 communication	

Model (Product Code)	Pump Head (Product Code)	Channel Number	Roller Number	Roller/Housing Material	Speed (rpm)	Tubing	Max. Flow Rate (mL/min)

KZ15-14-C	05.01.28C			PVDF			

T100/T300/T600 Series

*Good EMC performance.
Multi-control modes.
Standard pump head
mounting bracket can be
fitted with several different
pump head.
Low vibration, low noise.
Soleplate or panel installation.*

L500E-B012C-1
L500I-B012C-1
L500E-B024C-1
L500I-B024C-1

Brushless DC motor with built in controller has better reliability, longer life time and much lower noise.
Simple to control the speed by potentiometer or 0-4V analogue signal.
Fitted with different pump heads.
Soleplate or panel installation.

For YZ, FG, DMD, BZ pump heads

For KZ10,KZ15 pump head

OEM Variable Speed Peristaltic Pump

DC Drushless Motor Series

Brushless DC motor with built in controller has better reliability and longer life.
Fitted with different pump heads and support stacked pump heads for multichannel.
Mainly for OEM instrument and equipment.
Soleplate or panel installation.

Peristaltic Pump Tubing

Features of peristaltic pump tubing

- Good flexibility. Spring back after pressed radially
- Good wear abrasion resistance
- A certain extent pressure bearing capabilities
- Lower gas permeability
- Low absorption, good temperature resistance, not easy to aging, not swelling, anti-corrosion, fewer extractable.

Tubing parameters

Inner diameter and wall thickness are the main parameters of the tubing. Different manufacturers have different notations. Such as: specification codes or inner diameter × wall thickness.

Tubing materials

Silicon rubber, rubber, plastic, synthetic material, etc. Different materials have different characteristics and different applications.

Tubing selection factors

- Chemical Compatibility**
When transferring different fluids, the tubing should have good chemical characteristics. Such as: low absorption, good temperature resistance, good aging characteristics, low swelling, anti-corrosion, fewer extractable.
Chemical resistance decreases as temperature increases. Chemicals that have no effect on the tubing at room temperature could attack the tubing at elevated temperatures.
Chemical compatibility test method:
When the chemical compatibility of the tubing is uncertain, an immersion test is needed. In an immersion test, a small piece of tubing is weighed, and its diameter and length are measured. The tubing then is immersed in a closed vessel with the chemical in question for a minimum of 48 hours. Afterward, the test piece of tubing is rinsed, dried, weighed and measured, and any changes are recorded. The tubing also should be examined for signs of softening or embrittlements, which indicate the chemical has attacked the tubing. If the tubing survives the test without discoloration, swelling, cracking, loss of flow or other signs of deterioration, then it is compatible with the fluid.
- Pressure**
Peristaltic pump applications typically have been limited by the pressure capabilities of the tubing. If the pressure is too high, the tubing could swell, resulting in an improper fit through the pump head, which causes excessive wear and tubing failure.
The factors which affect the pressure are material, the proportion of diameter and wall thickness, etc.
- Temperature**
The working temperature range of a tubing material is another important consideration. Different materials have different temperature range.
- Dimension**
The size of the tubing has a direct effect on the amount of fluid delivered. Well-designed pumps are engineered to work with an optimum tubing size or range of tubing sizes, taking into account the tubing's inner diameter and wall thickness. The inner diameter determines the amount of fluid delivered with each turn of the rotor. The wall thickness affects the tubing's ability to spring back to its original shape after each compression, which has a great influence on the overall life of the tubing.
- Regulatory Approval**
Many tubing materials are designed to meet these various regulatory approvals, including those issued by the United States Pharmacopoeia (USP), European Pharmacopoeia (EP), U.S. Food and Drug Administration (FDA), U.S. Department of Agriculture (USDA) and National Sanitation Foundation (NSF).
- Tubing Flex Life**
Different tubing materials have differing abilities to withstand the repeated squeezing action of the rollers. In general, each tubing size, tubing material, pump head style, and operating speed in combination has its own life characteristics. Service life, or flex life in the pump, is the primary concern in a new applications. Pump performance is very consistent in a specific applications. Maximize the life of a pump system by selecting a tubing material that offers long flex life, using thicker wall tubing, and/or by operating a larger pump at slower speed.

Peristaltic Pump Tubing

Common Tubing Material

Silicone tubing: Ultra-smooth inner liner with extremely low leachables, low protein absorption, good flexibility and wide temperature range -51 to 238°C.
Various materials tubings are available.

Tubing Specifications:

Micro & small flow tubing

Tubing Sizes	0.13×0.9	0.51×0.9	0.76×0.85	1.52×0.85	2.06×0.85	3.17×0.85	0.5×0.8	1×1	2×1	2.4×0.8	3×1

Peristaltic Pump Accessories

Standard External Control Module

Dispensing Controller

Peristaltic pump equipped with dispensing controller has dispensing function.

Dispensing time	0-99.99S
Pause time	0-99.99S
Time resolution	0.01S
Work mode	Single or multiple
Internal count range	0-999, count up or count down
External count range	0-999999, "0" means unlimited cycle
External Start/Stop signal input	Open switch signal
Power-off memory	Return to previous status when powered on
Power supply	AC 220V/5W

Footswitch - JK Series

Multi-work modes and interfaces are available.

Tubing Fitting

Common tubing fitting material:

Natural Polypropylene (Natural PP):
Very good chemical resistance. Temperature range: 0 to 95°C.
Multi-material for tubing fitting are available.

Common tubing fitting type:

Straight, "Y" type, reducing connectors.
There are lots of other tubing fitting type available.
